YANKEE CAPPER.

It is adjustable so that it will cap
Pints and Quarts.

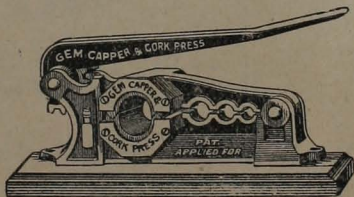

The Gem Bottle Capper and Cork Press.

The most practical Capping Machine ever put on the Market.

This machine in simplicity, durability and power is superior to all Capping machines either dry or hydraulic.

The rubbers are almost indestructible; they will neither burst nor break and allow of such a compression that one set will cap all ordinary bottles.

The Combination Cork Press is invaluable to bottlers.

Strainers.

No. 866. Strainer, silver plated, the spring edge adapts itself to fit any glass.

No. 323. Strainer, silver plated, can be adjusted to any glass.

Patent Paper Julep Straws.

Straws made of Manilla paper.

Thoroughly saturated with hot paraffine wax of high melting point.

Straws entirely free from Taste or Odor.

My straws cannot effect anything ever used as a drink.

Every paper straw is sweet clean and perfect.

Patent Julep Straws can never be used but once, as they will always show the marks of use.

But one straw necessary for each drink.

No cracked or musty straws. No time wasted in hunting for perfect straws when you use patent paper julep straws.

Cheaper and better than natural straws.

Health, cleanliness and economy assured by using patent julep straws.

All reputable druggists in the country use them at soda fountains in preference to natural straws.

All first-class clubs, hotels, saloons, restaurants, etc., use these straws.

If you try them once you will always use them.

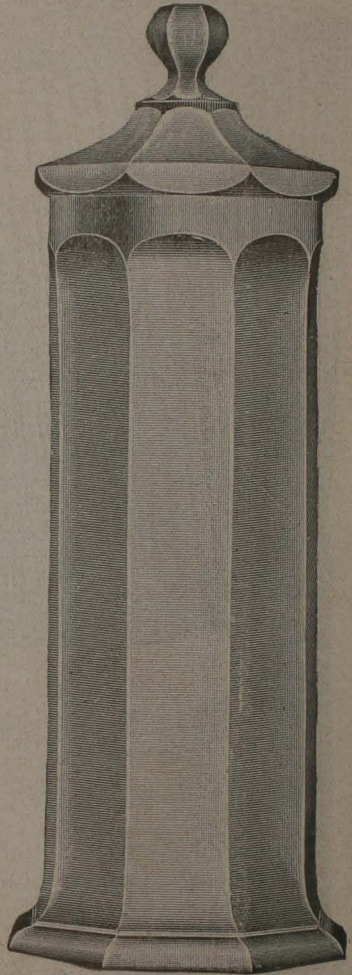

500
Stone's Patent Paper Julep Straws.

(Made under U. S. Patents January 9, 1893, and October 14, 1894.)

These Straws are made of Manilla Paper and hard, white Paraffine Wax of high melting point. They are free from taste or odor, and are not affected by anything used as a drink. They are larger than natural straws and one straw will always suffice. They can never be used but once as they will show the marks of use. Paper Straws are never "musty," and every one is sweet, clean and perfect.

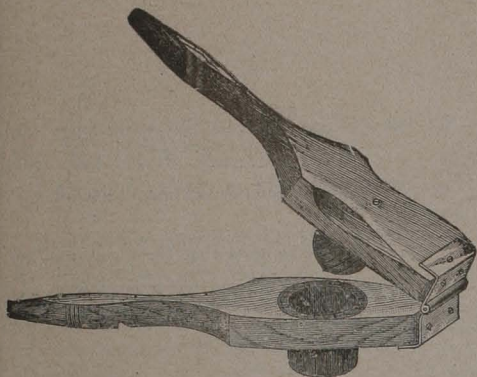

STRAW JARS.

No. 851. Made of Crystal Glass, imitation of cut, large and massive.

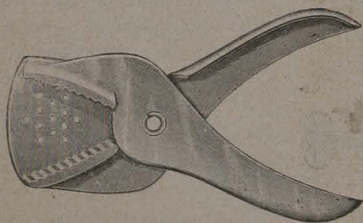

No. 1106. Straw Jar, made of fine Crystal Glass.

Lemon Squeezers.

No. 859 Boss Lemon Squeezer, made of hard sugar maple wood, nickel plated hinges, lignumvitae bowl, this is the best hand lemon squeezer made, we guarantee these.

No. 855. Lemon Squeezer, made the same as 859, steel hinges not plated and hard wood bowl.

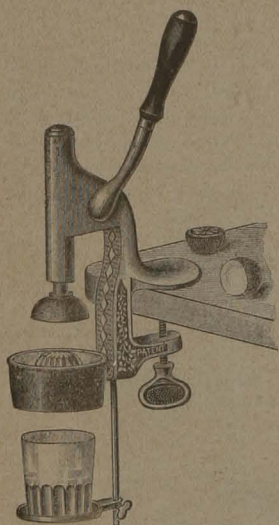

LIME SQUEEZERS.

No. 1188. Made of Aluminum. The best thing for limes.

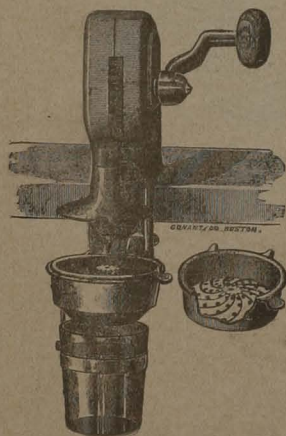

No. 1190. Lime Squeezer, made of Aluminum.

Lemon Squeezers.

No. 864. Lemon Squeezers, this is the finest machine that is made. If you have room on your counter you should have this.

We sell these agreeing that they will pay for themselves in the extra juice that is saved over any other machine made.

No. 538. Lemon Squeezer, this is a good machine and will grind out lots of work, in very little time, besides giving you all the juice,

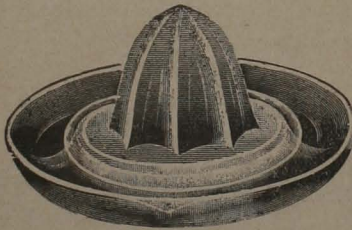

Lemon Squeezers.

No. 1425. Lemon Squeezer.

MONEY SAVED IS MONEY MADE

The Mosteller Automatic Lemon Squeezer will save 30 per cent of your lemon bills, as it will produce 30 per cent more juice than any machine on the market. It will cut and squeeze the lemons in the time required to cut the lemons by hand for use by other machines.

Figure the price of a case of lemons, and 30 per cent of that amount will represent the saving by using this. It will cut and squeeze four cases while he could squeeze one case with any other machine, and with reasonable care it will last for years.

No. 1426, Lemon Reamer. Made of Glass.

Muddlers.

- No. 963. Made of maple wood. Same size.
 " 964. Made of maple wood with porcelain tip
 Small size.

Sugar Tongs.

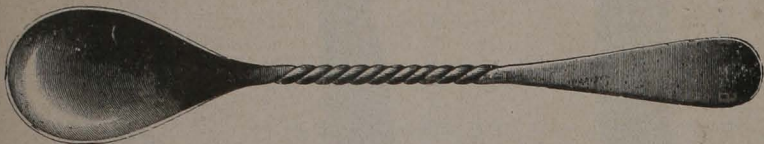

- No. 31. Made of white metal, silver plated.

ICE TONGS.

Nickel plated. Points can be taken out and new ones inserted

ICE SHAVER.

No. 638. Ice Shaver. This shaves the ice so that when it is put in decoction it becomes cold instantly, made of galvanized iron, steel blade

Force Cup.

No. 1054.

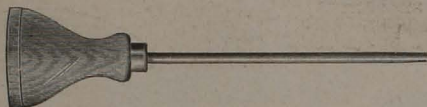

3 inch diameter.

4½ inch diameter.

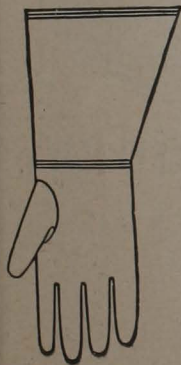

For instantly clearing the discharge pipes of wash bowls, bath tubs, stationary wash tubs, etc , when they become partially or entirely stopped.

In using this device, allow water to flow into the bowl or tub to a depth of three or four inches; the rubber cap is then placed directly over the vent, and the handle is forced down three or four times with a quick motion. The water beneath the cup is thus forced into the discharge pipe with a succession of sudden impulses which dislodges the obstruction, and forces it through the pipe. It is effective whether the obstructed point be near the bowl or twenty feet from it.

CLOSET FORCE PUMP.

No. 1388. This is a handy article to have around and will save you many Plumbing Bills.

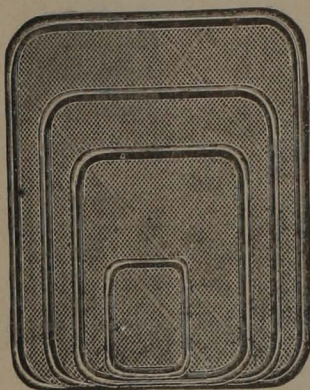

Gum Gloves.

No. 719. Gum Gloves. This is a very desirable article for all bartenders, they keep his hands in good condition, and saves you time as he does not have to stop to wash his hands.

Paste Polish. For cleaning all kinds Copper, Brass Signs, Brass Railings, and all kinds of Metal. Sold in 1 lb. cans.

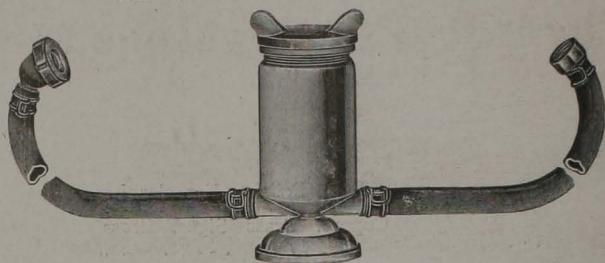

Swiftly Shine.

Liquid Polish for Brass Rails, Cuspids and everything in Brass, Copper, Nickel, etc., once tried always used.

EUREKA BEER PIPE CLEANER.

The Eureka Beer Pipe Cleaner is designed to thoroughly clean the beer pipes and faucets instantly and should be in use in every place beer is drawn.

By its use beer pipes may be cleaned at any time of the day or night without taking the ice from the coils.

The Eureka Beer Pipe Cleaner is made of bronze, heavily tinned, and is purposely made about three times heavier than is really necessary for the ordinary usage. The consequence is that it will not break if dropped or thrown down and will outlast a dozen of any other kind made. Will save its first cost many times and will always be found ready for use.

EUREKA BEER PIPE COMPOUND.

DIRECTIONS.

Put the contents of box into a beer barrel which you are not using, then put into the same barrel 6 gallons of water, let stand for a few minutes, turn on your air, forcing the mixture through the pipes to rinse.

By this simple process you can clean the dirtiest pipes and make them sweet and clean.

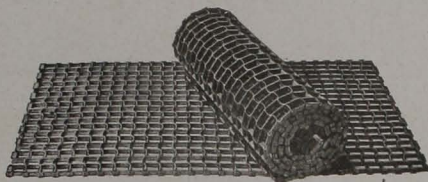

Dirty pipes cause bitter acid to accumulate in them, this in turn gives your beer that sharp, bitter taste. It makes no difference what beer you have, the finest beer brewed will get this way, unless you give it the proper attention. Why not have good beer if this is all the work you need to help you along?

This compound has been prepared after analysis of several beers and consequently is just as perfect as it is possible to make it.

Give it a thorough trial and you will find that you need not complain to your brewer about that last barrel. Also helps your trade and makes it larger.

In using the Eureka Pipe Cleaner, use $\frac{1}{2}$ can of Compound.

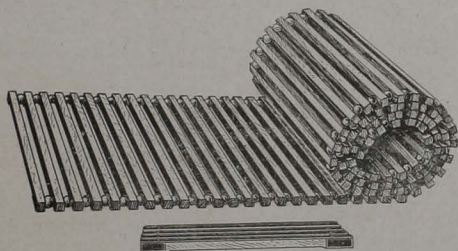

The "ONLY" Keystone Mat.

THE OLDEST. THE BEST.

The Keystone Wire Mat is made of crimped, flat galvanized steel strips, three-eighths of an inch deep by one-sixteenth of an inch thick, hinged together with galvanized steel rods, admitting of its being rolled up like an ordinary piece of straw matting. It is the most durable mat made. It is reversible, cannot warp, or curl at the sides or edges, and adapts itself to unequal surfaces. It always lies flat. No danger of slipping on this mat; scrapes shoes in every direction; can be left out in every weather. It is self cleaning. A good sized house mat can be rolled into so small a compass as to be easily carried.

Simplex Flexible Wooden Back Bar Matting.

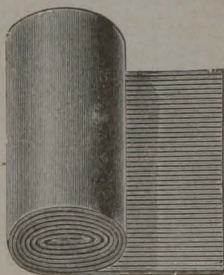

A PERFECT BAR AND SODA FOUNTAIN MAT.

Elevates from all moisture and gives thorough ease of standing in front of or behind bar. For service in any capacity where Dry Feet or Ease of tread are a consideration.

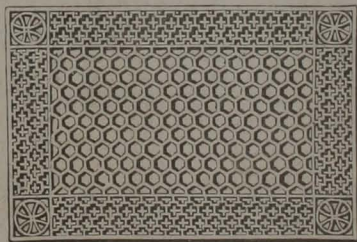

Ball bearing flexibility, neat in appearance, durable, satisfactory. Once tried, always used.

Corrugated Gum Matting.

Gum Matting. Corrugated. In rolls, cut to any size, also cut for Stair Treads.

Corrugated Rubber Mats.

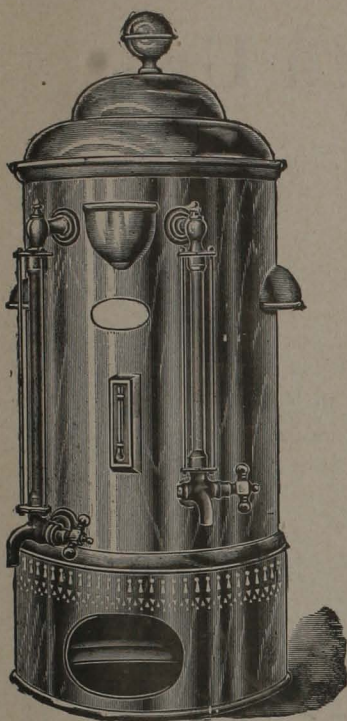

All sizes made to order.

Trays.

Trays for setting urn on, made in different sizes for all sizes of urns, adds to the appearance of your urn and also protects your counter.

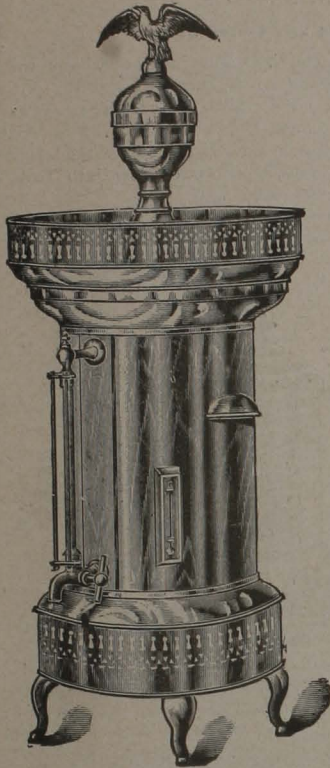

Hot Water Urns.

No. 540. 2 gallons.

“ 541. 3 “

“ 542. 4 “

Made of heavy copper block tin, lined and handsomely finished, with good nickel plate.

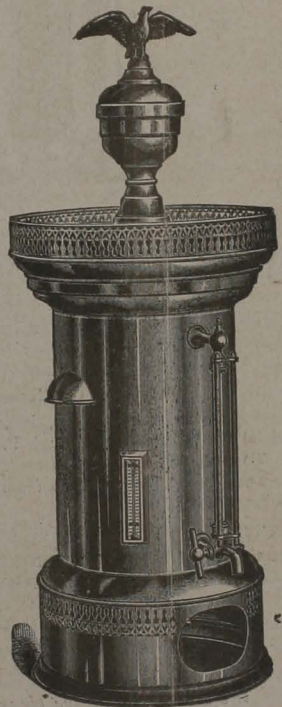

No. 520. 2 gallons.

“ 551. 3 “

“ 552. 4 “

This is the best and handsomest Urn on the market. It is so arranged that the combustion is almost perfect, being so arranged that there is no chance of smoking the outside of the urn. It is made of A No. 1 material and we can recommend this for those wanting a good article.

DIRECTIONS FOR USING SETS OF

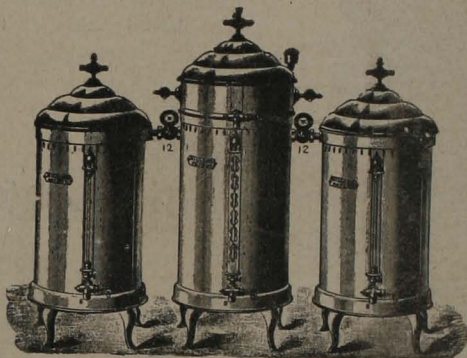

Miller's Patent "ECONOMY" Tea and Coffee Urns.

Turn on water supply under middle Urn. The indicator in front shows the amount of water.

Turn gas on full until steam escapes through safety valve on top. That shows the water is boiling, ready for making Tea and Coffee.

Then remove the cover A. Place Tea or Coffee in basket D, replace the outer cover A, turn on valve 12 and let the required amount of water flow into Urns from water boiler. The indicator will show quantity used.

Have gas turned on full at all times under Tea and Coffee Urns when in use. Being automatic they will keep Tea and Coffee at the proper temperature.

Directions for Using the Single.

Miller's Patent "Economy" Tea & Coffee Urn.

They are used same as sets, and care must be observed in having the water boiling before pouring it over the Tea or Coffee.

Directions for Burner.

Be careful in setting the burner. They are fully tested and regulated as to height and capacity for each size of Urn. Turn on gas full at all times when in use. There is no fear of waste, we have looked after that matter.

To Cleanse and Renew the Bags.

To cleanse the bag, take it from Urn, turn it inside out, hold it under faucet and let the water flow through it.

To renew the bags, being made with a slight opening top and bottom, the wire can be easily removed from the old bags and inserted in the new ones. No sewing required.

I keep all sizes of bags in stock.

Exact Cost of Miller's "ECONOMY" Tea and Coffee Urns by the day of 12 hours.

We also make Coffee Urns with Hot Water Bath for Gas or Steam.

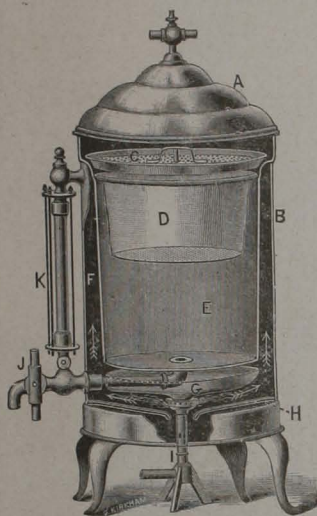

WE HAVE THE AGENCY FOR

MILLER'S PATENT ECONOMICAL AND AUTOMATIC URNS

Description

—OF—

SECTIONAL VIEW

In general outline Miller's New Improved "Economy" Urn resembles our famous Heat-Saving Hot Water Urn.

Still, the difference in the inner structure is so far in advance of anything hitherto attempted that a careful examination of the sectional illustration is necessary.

"A"—Is the cover for the Urn, and also acts as a sterilizer when our Improved Milk Head is used.

"B"—Is the outer section or Jacket.

"C"—Is a spray pan upon which the water is poured and so, evenly covering the entire Tea or Coffee which is placed in the Bag.

"D"—The Bag or Basket, is so constructed that only the pure essence of the Tea or Coffee passes through its strainer to the receptacle below, and from where it is drawn, for the consumer.

"E"—Is the crock of the Urn into which the essence of the Tea or Coffee enters and where it is kept at the required heat, so that it is ever ready for use.

"F"—Is the Hot Air Chamber between outer and inner section, and is so constructed that

"G"—The diaphragm over the burner, distributes only the requisite amount of hot air, to keep it permanently at a given heat.

"H"—The guard plate, so formed that it cannot admit more than the burner can heat, and the diaphragm distribute.

"I"—Is Gas Burner, thoroughly tested and regulated by strict thermic law for each size of Urn, and cannot deviate.

"J"—Is our specially made faucet, and, like all other faucets is constructed with a wooden handle covering all Metal parts. Owners and waiters who have burned their hands so frequently, will appreciate this device.

"K"—Is the gauge indicating the amount of Tea or Coffee which each Urn contains.

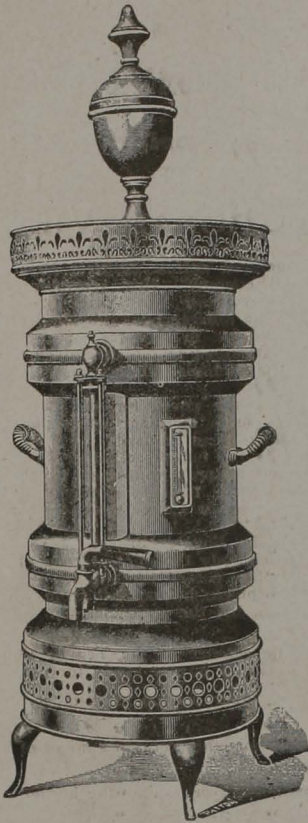

All our Urns are made to be fitted with, or without our Improved Milkhead. They are round bottomed, free from corners, thus can easily be kept clean.

Our Milkhead faucets are fitted with a screw end, so that they can be unscrewed, cleaned and always kept sweet.

N. B.—Our 3-gallon size of Urn can be kept at the proper stage of heat all day long at the trifling cost of 3 cents. Other sizes in proportion.

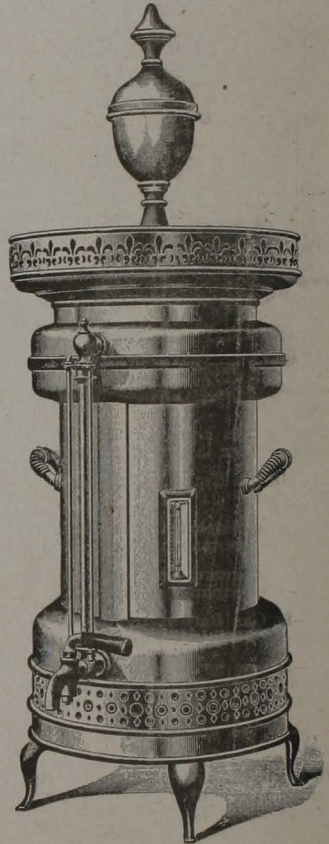

All our Urns can be operated either by Gas or Oil. Gasoline however being the most Economic, when obtainable.

These Urns are the grandest achievement of the age.
