Following the very successful merchandising of our original flaconettes, the Petite Flaconette and the new Crystalettes have been designed to be even more modern and attractive. The sharp shoulders and distinct molded caps give the packages unusual smartness. They will be found an effective stimulus to the sale of bulk perfumes through drug and department stores.

The group of Emerald Green Pantry Jars illustrated, with the exception of the Spice Jar, is a special combination, consisting of four 40 oz. jars, two 16 oz. jars and four 7½ oz. jars. The unit is packed in a corrugated container measuring 10½" x 10¾" x 8" weighing approximately 12 pounds. The Salt and Pepper Shaker, the most popular items, are packed 2 dozen each to a case. These and the other jars may be obtained separately as well as in the assortment.

The Dinette Shakers, P-113, have applied color stripes in green, black, yellow and coral. Molded "Plaskon" caps are in colors to match. Dinettes are packed 1 dozen pairs single color to an inner carton, 6 dozen pairs to an outer carton, colors assorted as desired.

Tea Time Shakers are emerald green glass with either metal or composition caps. Mold P-135 has an "Ambrac" metal cap as illustrated and mold P-83 has "Plaskon" black molded caps.

**All of nature's rich flavor is retained in glass still none of her rich coloring is hidden by glass. Above is an unretouched color photograph of a number of glass packed foods. Compare their appearance with that of any other type of container with which you are familiar, remembering that more sales are induced through "eye appeal" than by any other method. More than a collection of words is the slogan—"See What You Buy—Buy in Glass."**

## **GLASS—the Ideal Food Container**

**B**ecause of its acid resisting nature, and enticing transparency glass is recognized as the ideal container for preserved foods—because of its transparency also, glass constitutes a challenge to the producer to pack and use only the very best of ingredients.

The woman of today knows that while all good foods may not be packed in glass—all glass packed foods are good foods. She has come to accept a glass package as a guarantee of highest quality.

A large majority of food packers use Owens-Illinois containers and they are basis for comparison everywhere. The glass from which they are blown is clear, free from blemishes and strong. Their extreme accuracy minimizes filling, capping and labeling problems. Their appearance adds much to the attractiveness of the completed package.

Bottles are more than paper and string for liquids. They command the best of display space—they reflect the care with which their contents have been prepared—they radiate purity and quality.

So often a buyer will point to an article on a retailer's shelf and say, "That's it." For some reason the trade name has been forgotten or confused with another, but the package has registered on the mind's eye. Score a point for the distinctive container.

There is economy in the use of stock containers and of course more assurance that a supply will be on hand for an emergency. However, when volume permits or for some

reason a distinctive shape is necessary or desirable, we can design and produce whatever you require.

When your fine products are packed in Owens-Illinois containers you can be assured that they will appear at their very best and that favorable consideration will be given the question of their display. Sales result, and upon sales depend turnover and profit.
